

Commercial Invoice Checklist

ClearanceIQ Import Kit · CBP Entry Accuracy

CBP uses the commercial invoice to classify and value your goods. Errors trigger holds and penalties.

Required invoice fields

- Seller & buyer complete names/addresses
- Detailed product description (not just 'parts')
- Quantity + unit price
- Total value in USD
- Incoterms (FOB, CIF, DDP...)
- Country of origin per line
- HTS code if known
- Currency + exchange basis

Common mistakes that cause holds

- Generic descriptions ('gift', 'sample', 'parts')
- Value that doesn't match payment records
- Missing origin leads to full exam
- Mismatched weights vs packing list
